In the Black Kiosk expands the functionality of our Retail Suite of applications with an innovative integrated solution which allows implementation of custom applications designed to enhance customer and employee interaction.

- Allow customer signup
- Check their loyalty points
- Provide product locator
- Check availability
- Process special orders

"Helping customers help themselves" is a relatively old idea -- but one that has become a growing business priority.

Consumers increasingly accept and even prefer the idea of self service and

many retailers are looking to not only reduce costs but also improve customer satisfaction.

ITB Kiosk allows access to enterprise data for products, promotions and customer information providing a powerful and flexible software package for developing touch screen information kiosk applications.

Designed as part of our Enterprise solution, kiosk allows customers and employees to access information and perform routine tasks over the network without requiring any staff interaction.

POS terminals can now provide a dual function-checkout and self-service.
